Structure of Government

Statistical Yearbook of Bhutan 2002 is the twentieth in the series of Annual Statistical Publication issued by the Central Statistical Organization, Planning Commission.

The Purpose of the publication is to provide a summary of the more important statistics of Bhutan. Statistics have been presented under a number of subject headings corresponding to the major areas of statistical interest. A short introductory text for each chapter provides a brief description of the statistics, how they were obtained and any existing shortcomings. Some of the more interesting features of the Statistics have also been highlighted.

In preparing the publication, attempts have been made to assess the quality of each data source and where appropriate, tables have been footnoted to highlight any shortcomings in the data.

Every effort has been made to ensure that the statistics given in the publication meet acceptable statistical standards. However, it has been necessary to place reliance on existing data collections and it was not always possible to undertake as detailed an assessment of data sources as would have been preferred. This was due to the wide range of data sources used and because detailed background information on many data collections was not always available. Consequently, some shortcomings in the data presented are inevitable, though it is considered that these have been kept to a minimum. Throughout the compilation of the publication, the CSO has maintained close contact with all sectors.

It's our effort to improve the range and quality of statistics available on Bhutan, and will be reflected in each of the annual up gradation of the publications.

TABLE OF CONTENTS

General Description of Bhutan.....	i-iv
General Information.....	v-viii
Bhutan at a glance.....	ix
 Chapter 1: POPULATION	 1 - 2
 TABLE;1.1:Population estimates by age and sex, 2002.....	 3
1.2:Summary of population indicators 1996 to 2002.....	4
1.3:Percentage of population by marital status and age, 1984.....	5
1.4:Summary of Demographic indicators, Bhutan 1984, 1994 and 2000.....	6
 Chapter 2: HEALTH	 7 - 8
 TABLE;2.1:Summary of Health facilities and personal, Bhutan 1997 to 2001.....	 9
2.2:Type of Health facilities and personal by Dzongkhags, 2001.....	10
2.3:Health personal by category, 1997 to 2001.....	11
2.4:Number of patients treated in basic health units by diseases, sex and age, Bhutan, 2001.....	12
2.4:(cont.) Number of Patients treated in basic health units by diseases, sex and age, Bhutan, 2001.....	13
2.5:(a)Patients treated in basic health units by disease, Bhutan, 1997 to 2001.....	14
2.5:(b)Patients treated in basic health units by disease, Bhutan, 1997 to 2002.....	15
2.6:Number of patients treated in Hospital for various disease by sex and age, Bhutan, 2001.....	16
2.6:(cont.)No. of patients treated in Hospital for various disease by sex and age, Bhutan, 2001.....	17
2.6:(cont.)No. of patients treated in hospital for various disease by sex and age, Bhutan, 2001.....	18
2.6:(cont) No.of patients treated in hospital for various disease by sex and age, Bhutan, 2001.....	19
2.7:Number of patients reported in different hospitals,1996 to 2001.....	20
2.8:Number of individuals covered by immunisation activities Dzongkhag,2001.....	21
2.9:Incidence of E.P.I. Diseases for children below age 15,Bhutan, 1994 to 1999.....	22
2.10:Detail of child growth monitoring in immunisation clinics,Bhutan, 1995 to 2000	23
2.11:Detail of maternal and child health care services, 1995 to 2000.....	24

2.12: Detail of maternal health care activites by Dzongkhag, 1997 to 2001.....	25
2.12: (cont..)Details of maternal health care activites by Dzongkhag, 1997 to 2001.....	26
2.12 (cont..)Details of maternal health care activites by Dzongkhag, 1997 to 2001.....	27
2.13: Detail of complications during pregnancy, delivery and puerperium, Bhutan,2001...	28
2.14: Family planning acceptors by type of method, Bhutan, 1996 to 2001.....	29
2.15: Number of users family planning methods by type by Dzongkhag,2001.....	30
2.16: Details of leprosy patients,Leprosy control programme, 1996 to 2000.....	31
2.17: Number of blood slide examnations formalaria and malarimetric indices, Bhutan, 1996 to 2000.....	32
2.18: Number of Tuberculosis cases by type, Bhutan,1993 to 2000.....	33
2.19: Water and sanitation facilities by type and by Dzongkhag,2001.....	34
2.20: Number of patients treated outside Bhutan in india by sex and casualties, 1994/95 to 2000/01.....	35
Chapter 3: EDUCATION	36
TABL Number of school and institutions, staff and students, Bhutan,2001.....	37
3.2: Number of educational institution, Teachers and students Bhutan,1991 to 2001.....	38
3.3 Number of educational facilities by type and Dzongkhag,2001.....	39
3.4: Number of Teachers in educational institutions by nationality, Bhutan, 2000 to 2001.....	40
3.5: Number of educational facilities, Teachers and students by Dzongkhag, April, 2000.....	41
3.6: Number of enrolment in educational institutions, Bhutan, 1996 to 2000.....	42
3.7: Number of students by Dzongkhags and type of school, 2001.....	43
3.7: (cont.) Number of students by Dzongkhag and type of school, 2001.....	44
3.8: Number of students by grade and type of school, Bhutan, 2001.....	45
3.8: (cont.) Number of students by grade and type of school, Bhutan 2001.....	46
3.9: Number of students by grade, 1996 to 2001.....	47
3.10: Number of students enrolled, promotes,repeaters and dropouts by sex and grade, 2001.....	48
3.11: Monthly stipend for boarders in different educational institutions, 2001.....	49
3.11: (cont.) Monthly stipend for boarders in different educational institutions, 2001.....	50
3.12: Number of teacher by educational level in school and institute; 2000.....	51

3.12: (cont.) No of teacher by educational level in school and institute,2000.....	52
3.12: (cont.) No of teacher by educational level in school and institute,2000.....	53

Chapter4: HUMAN RESOURCES. 54

TABLE; Percentage of population according to economic activity by age an	55
4.2: Employment in Civil Service, Bhutan, 1997 to 2001.....	56
4.3: Percent distribution of unemployed persons by age-sex and area of residence, Bhutan, 1998.....	57
4.4: Percent distribution of unemployed persons by age -sex and area of residence, Bhutan, 1999.....	58
4.5: Percent distribution of employed persons by age -sex and area of residence, Bhutan, 1998.....	59
4.6: Percent distribution of employed persons by age -sex and area of residence, Bhutan, 1999.....	60
4.7: Percent distribution of economically active and inactive population by age and area of residence, participation rate, Bhutan, 1999.....	61
4.8: Percent distribution of economically active and inactive population by age and area of residence, participation rate, Bhutan, 1999.....	62
4.9: Percent distribution of economically active and inactive population by age and area of residence, participation rate, Bhutan, 1999.....	63
4.10: Percent distribution of economically active and inactive population by age and area of residence, participation rate, Bhutan, 1999.....	64
4.11: Percent distribution of population in different economic status by sex and area of residence,Bhutan, 1998.....	65
4.12: Percent distribution of population in different conomic status by sex and area of residence, Bhutan, 1999.....	66
4.1 Percent distribution of population in different economic status by sex and area of residence, Bhutan, 1999.....	67

Chapte LAND USE AND AGRICULTURE. 68

5.1: Land use and vegetation types as percentage of total area of Bhuta	69
5.2: Area of Dzonghkags as a percentage of total area of Bhutan by type of Land cover,1995.....	70
5.3: Altitude Zones of Dzongkhags as percentage of their total area, 19	71
5.3: (cont.)Altitude Zones of Dzongkhags as percentage of their total a	72
5.4: Area of Dzongkha as a percentage of total area of Bhutan by altitude Zones, 1995.....	73

5.4: (cont.) Area of Dzongkha as a percentage of total area of Bhutan by altitude Zones, 1995.....	74
5.5: Average monthly temperature at various stations by Dzongkhag, 2001.....	75
5.5: (cont.) Average monthly temperature at various stations by Dzongkhag, 2	76
5.5: (cont.) Average monthly temperature at various stations by Dzongkhag, 2	77
5.6: Total monthly rainfall at existing stations by Dzongkhag, 2001.....	78
5.6: (cont.) Total monthly rainfall at existing stations by Dzongkhag, 2001.....	79
5.7: Number of agriculture research and extension centres, Bhutan, march 2001	80
5.8: Irrigation schemes constructed in Dzongkhags, 1996/97 to 1998/99.....	81
5.9: Quantity of pesticides supplied to farmers, Bhutan 1986/87 to 1998/99...	82
5.10: Land user agriculture use by Dzongkhag, 1995.....	83
5.11: Holders by size of holding in each Dzongkhag, 1988/89.....	84
5.12: Holders, area, production and yield of major crops by Dzongkhag,1988/89	85
5.12: (cont.) Holders, area, production and yield of major crops by Dzongkhag, 1988/89(a).....	86
5.13: Annual crops by number of holders harvesting each crops and area harvested, Bhutan, 1988/89.....	87
5.14: Quantity of seed planted and production of potatoes by variety and region, 1992/1993 to 1994/1995.....	88
5.15: Perennial crops by zones, 1988/89.....	89
5.16: Holders by size of livestock holding, 1988/89.....	90
5.17: Number of livestock by type and Dzongkhag,1997.....	91
5.18: Number of selected livestock by breed, Bhutan, 1994 to 1997.....	92
5.19: Imports and distribution of food items by Food Corporation of Bhutan, 1995 to 2000.....	93
5.20: Quantity of agricultural produce handled by Food Corporation of Bhutan, 1995 to 2000.....	94
5.21: Details of protected areas in Bhutan, by year of establishment and area, 2000.....	95
5.22: Quantity and value of Forest products supplied by type and users 1995/96 to 1997/98.....	96
5.23: Production of logwood, 1995 to 2000.....	97

CHAPTER 6: INDUSTRIES 98

TABLE: 6.1: Number of industrial establishments by sector, Bhutan, 1997 to 2001....	99
6.2: Number of licensed firms in manufacturing and mining industries by sector, 2000 to 2001.....	100
6.3: Number of industries by sector, size and type, Bhutan, 1997 to 2001.....	101
6.4: Number of contract firms and industries by Dzongkhag,2001.....	102
6.5: Number of industries by type by Dzongkhag, 2001.....	103
6.6: Number of mining and manufacturing industries by employment size, 1989.....	104
6.7: Percentage of employees by nationality in mining and manufacturing industries, 1989.....	105
6.8: Production of mines and minerals, 1997 to 2001.....	106
6.9: Production and use of mines and minerals, Bhutan, 2000 to 2001.....	107
6.10: Number of establishments by type of industry and sector, 1997.....	108
6.11: Distributions of establishments by Dzongkhags, 1997.....	109
6.12: Number of establishments by sector and size of employment, 1997.....	110
6.12: (cont.) Number of establishments by sector and size of employment, 1997.....	111
6.13: Persons engaged at the end of each quarter by type of work by industry, 1997.....	112
6.13: (contd..) Persons engaged at the end of each quarter by type of work by industry, 1997.....	112
6.14: Number of persons engaged in industrial sectors by employment status and sex, 1997.....	113
6.14: (cont.): Number of persons engaged in industrial sectors by employment status and sex, 1997.....	113
6.15: Percent of expenditure on fuel used by sector, 1997.....	114

CHAPTER 7: TRANSPORT AND COMMUNICATION 115-116

TABLE: 7.1: Length of roads by type, Bhutan, December 2001.....	117
7.2: Length of roads by type and Dzongkhag, Bhutan, 2001.....	118
7.3: Number and length of bridges by type, Bhutan, 2001.....	119
7.4: Number of suspension bridges completed during I to VIII five year plan periods by Dzongkhag.....	120
7.5: Number of registered vehicles by type and region,1998 and 2001.	121
7.6: Number of new motor vehicle driving licences issued (a) by type of vehicle,1993 to 1998.....	122

7.7: Details of public road transport services, 1993 to 1998.....	123
7.8: Number of passengers carried and revenue earned by Druk air flights by sector, 1996 to 2001.....	124
7.9: Number of flights made by Druk air by sector, 1995 to 1999.....	125
7.10: Telephone connection capacity by exchange, 1997 to 2001.....	126
7.11: Number of telephone trunk circuits, Bhutan, 1999.....	127
7.12: Number of trunk lines, connection capacities and sets in use, 1994 to 1998.....	128
7.13: Number of telephone trunk calls by type, 1995 to 1999.....	129
7.14: Telecommunication traffic in minutes and revenue earnings, Bhutan 1996 to 2000.....	130
7.15: Number of communication facilities, 1994 to 2000.....	131
7.16: Volume of postal mail traffic by destination, 1995 to 1999.....	132
7.17: Volume of mail handled by type of article and destination, 1999.....	133
7.18: Number of value of money order by type, 1995 to 1999.....	134
CHAPTER 8: ENERGY	135
TABLE: 8.1: Electricity generating stations and their capacities, FY, 1999/00 and 2000/2001.....	136
8.1: (cont..) Electricity generating stations and their capacities, FY, 1999/00 and 2000/2001.....	137
8.2: Total electricity generation and supply, 1996/97 to 2000/01.....	138
8.3: Major transmission lines for evacuating hydropower from Chukha Power plant, 2000 and 2001.....	139
8.4: Details of domestic electrical energy consumption, 1997/98 to 2000/01...	140
8.5: Monthly revenue from sale of energy from Chukha hydropower, 1999 to 2001.....	141
8.6: Consumption of electricity by type of consumer, 1995/96 to 1999/00.....	142
CHAPTER 9: TOURISM	143
TABLE: 9.1: Number of annual tourist arrivals to Bhutan by country of residence, 1996 to 2001.....	144
9.2: Tourist arrivals by country of residence and tourism revenue receipt, 1996 to 2001.....	145
9.3: Number of tourist arrivals by season and month, 1996 to 2001.....	146
9.4: Number of tourist arrivals by purpose of visit. 1997 to 2001.....	147
9.5: Number of tourist arrivals by mode of transport, 1997 to 2001.....	147

CHAPTER 10: FOREIGN TRADE AND BALANCE OF PAYMENTS	148
TABLE: 10.1: Balance of payments estimates, FY, 1997/98 to 2000/01.....	149
10.2: Value of exports and imports, Bhutan, Calendar Year from 1997 to 2000.....	150
10.3(a): Commodities of import from third countries, calendar year from 2000...	151
10.3(b): Commodities of import from third countries, calendar year from 2000....	152
10.4: Ten major commodities of exports and imports to and from third Countries (a), calendar year from 2000.....	153
10.4 (cont..) Ten major commodities of exports and imports to and from third Countries (a), calendar year from 2000.....	154
10.5: Value and its percentage share of exports to ten selected countries each year, calendar year from 2000.....	155
10.6: Value and its percentage share of Imports from ten selected countries calendar year from 1995 to 1997.....	156
10.7: Gross International reserves, 1995/96 to 1999/00.....	157
10.8: Monthly average exchange rates, Ngultrums per US dollar, 1994 to 2000..	158
CHAPTER 11: MONEY, BANKING AND FINANCE	159
TABLE: 11.1: Monetary survey (a), Royal monetary Authority and Bank of Bhutan, 1997 to 2001.....	160
11.2: Financial details of Royal Insurance Corporation of Bhutan, 1997 to 2001.....	161
11.3: Financial details of Bhutan National Bank, 1997 to 2001.....	162
11.4: Money and Banking details of Bhutan Development Finance Corporation, 1997 to 2001.....	163
11.5: Money and Banking of Royal monetary Authority of Bhutan, 1995 to 2000.....	164
11.6: Money and Banking, Bank of Bhutan, 1997 to 2001.....	165
11.7: Investments of financial institutions by industry (a), amounts outstanding, 1998 to June 2001.....	166
11.8: Interest rates for deposits in financial institutions, 1997 to 2001.....	167
11.9: Interest rates and repayment period by sector and type of loan, Financial institutions (a), 2001.....	168
11.10: Royal security Exchange of Bhutan Limited number of shareholders, 1998 to 2000.....	169
11.11: Royal Security Exchange of Bhutan limited market information, 2000.....	170
11.12: Royal Security exchange of Bhutan limited Volume price taken at end of Year 1999 and 2000.....	171
11.13: Royal Security Exchange of Bhutan limited traded values (Ngultrums) 1998 and 2000.....	172

CHAPTER 12: PUBLIC FINANCE	173
TABLE: 12.1: Current budgetary expenditure of the government by ministry/agency, 1997/98 to 2000/01.....	174
12.2: Budgetary development expenditure of the government by ministry, 1997/98 to 2000/01.....	175
12.3: Budgetary receipts of the government by source, 1997/98 to 2001/02.....	176
12.4: Summary of budgetary operations, 1997/98 to 2001/02. (a).....	177
CHAPTER 13: PLAN OUTLAYS	178
TABLE: 13.1: Outlays of development plans, first to eighth plan.....	179
13.1:(cont) Outlays of development plans, first plan to eight plan.....	180
13.2: Outlays of development plans, percentage by category, first plan to ninth plan (a).....	181
13.2: (cont.). Outlays of development plans, percentage by category, first plan to ninth plan (a).....	182
13.3: Financial outlays during eighth plan by sector, 2002 to 2007.....	183
13.3: (cont..)Financial outlays during eighth plan by sector, 2002 to 2007.....	184
13.4: Dzongkhag wise seventh five-year plan outlay, 1997 to 2002.....	185
13.5: Dzongkhag wise eighth five-year plan outlay, 2002 to 2007.....	186
CHAPTER 14: GROSS DOMESTIC PRODUCT	187
TABLE: 14.1: Gross domestic product at factor cost in current prices by kind of activity, 1996 to 2000.....	188
14.2: Gross domestic product at factor cost in 1980 prices by kind of activity, 1996 to 2000.....	189
14.3: Compound growth rate of gross domestic product during fifth to eighth plan by kind of activity.....	190
14.4: Percentage composition of gross domestic product by various activities, 1996 to 2000.....	191
14.5: Gross domestic capital formation by major components, 1996 to 2000.....	192
14.6: Share of gross domestic capital formation in GDP at market prices, 1996 to 2000.....	193
14.7: Gross and net capital formation, 1996 to 2000.....	194
14.8: Gross and net domestic product and related aggregates,	195

14.9: Estimates of final consumption expenditure, Gross domestic savings and savings in Current prices, 1995 to 1999.....	196
CHAPTER 15: PRICES	197
TABLE: 15.1: Consumer price indices for food and non-food components, Bhutan, June 2000 to June 2002.....	198
15.2: Consumer price indices for major items, Bhutan, June 2000 to June 2002.....	199
15.3: Consumer price indices for major items, Bhutan, June 2000 to June 2002.....	200
15.4: Consumer price indices for major items, Bhutan, June 2000 to June 2002.....	201
15.5: Consumer price indices for food items, Bhutan, June 2000 to June 2002.....	202
15.6: Consumer price indices for food items, Bhutan, June 2000 to June 2002.....	203
15.7: Consumer price indices for food items, Bhutan, June 2000 to June 2002.....	204
15.8: Quartely price indices for food items, Thimphu town, 1997 to 2002.....	205
15.9: Quarterly price indices for food items, Thimphu town, 1996 to 2000.....	
CHAPTER 16: CRIME	207
TABLE: 16.1: Crime reports by nature of crime, Bhutan, 1997 to 2001.....	208
16.2: Details of crime against human body, Bhutan, 1996 to 2001.....	209
16.3: Details of sexual offences, Bhutan, 1996 to 2001.....	210
16.4: Details of crime against property, Bhutan, 1997 to 2001.....	211
16.5: Details of motor vehicle, antiques, forest offences and fire incidents Bhutan 1997 to 2001.....	212
16.6: Motor vehicle accidents by traffic division Bhutan, 2001.....	213
16.7: Motor vehicle accidents by cause by traffic division Bhutan, 2001.....	214
16.7: (cont..). Motor vehicle accidents by cause by traffic division, Bhutan, 2001.....	215
16.8: Number of motor vehicle accidents by traffic division, Bhutan, 1997 to 2001.....	216
Map of Bhutan	217
Annex I: Administrative units with their standards spellings.....	218-221

GENERAL DESCRIPTION OF BHUTAN

Position and area: Bhutan comprises a land area of 38,394 square kilometers. The land lies between latitudes 26°45'N and 28°10'N and between longitudes 88°45'E and 92°10'E. The country is relatively compact with a maximum latitudinal distance of 170 kilometers and the maximum longitudinal distance of 300 kilometers. Bhutan is landlocked and is bordered by India in the south and by the Tibetan Autonomous Region of China in the north and northwest. Bhutan's borders are largely natural ones. The border with Tibet is traditional following the watershed of the Chumbi Valley in the northwest and the crest of the Himalayas in the north. The southern border with India was established by treaty with the British in the nineteenth century and basically follows the line made by the Himalayan foothills with the plains.

Landform: Bhutan is almost entirely mountainous with flat land limited to the broader river valleys. The land rises from approximately 300 meters above sea level in the south to the towering Himalayan mountains in the north of over 7,000 meters high. The densely populated central valleys are separated from the south by a 2,000-meter high chain of mountains. Bhutan has three major landform features; the southern foothills, the inner Himalayas and the higher Himalayas. The southern foothills rise from the plains to heights of 1,500 meters extending to the north by about 20 kilometers. Southern Bhutan consists of a heavy network of steep hills covered with large tracks of dense forests and jungles. Central Bhutan consisting of the inner Himalayas rises gradually to about 3,000 meters. This region contains the broader river valleys of Paro, Thimphu, Punakha, Wangduephodrang, and Trashigang, which comprise the economic and cultural heartland of the country. An infinite variety of plants, flowers and trees including apples, peaches and plums grow in the fertile valleys. Rice is the principle crop and large tracts of forests including birch, pine, chestnut and oak cover central Bhutan. The northern region comprises the main Himalayan range of high snow capped mountains which separate Bhutan from Tibet. The Kulagangri and the Gangkar Punsum (both over 7,500 meters) and the Jomolhari (7,316 meters) are the highest peaks in the Bhutan Himalaya. The slopes of the mountains are covered with birch, magnolia and rhododendrons while for many months of the year the summits are decked with snow. Population in this zone is sparse.

Rivers: All but two of Bhutan's rivers rise in the higher Himalayas and journey south to join the Brahmaputra in India. Almost all the valleys have swift flowing rivers or streams, which

merge ultimately into four major river systems as they flow south viz. the Ammochu, the Wangchhu, the Sankosh and the Manas. The flows of the rivers are fed by the perennial snows or the summer monsoons and are highest in the monsoon season (June to September) and lowest in winter (December to March).

Climate: The country can be divided into three distinct climatic zones corresponding broadly to the three main geographical divisions. The southern belt has a hot humid climate with temperatures remaining fairly even throughout the year between 15 and 30 degree Celsius with rainfall ranging between 2,500 to 5,000 millimeters in some areas. The central inner Himalayas has a cool temperate climate with annual rainfall averaging about 1,000 millimeters with western region receiving comparatively higher rainfall. The higher and more northern region has a severe alpine climate with annual rainfall around 400 mm. Much of the rainfall is concentrated in the summer months with the southwest monsoon accounting for 60 to 90 percent of the total rainfall. There is substantial variation within these broad ranges and the climate and rainfall characteristics change dramatically from one valley to an adjacent one with consequent sharp changes in the composition of agricultural production. Wide spread flood rainfall may occur during summer monsoon and the waters of the valleys may swell dramatically, spreading across the plains and flooding fields, bridges and houses.

Government: On 17 December 1907, Ugyen Wangchuck was crowned the first hereditary monarch of Bhutan by the civil and monastic representatives. It was as a result of the influence of the strength and the farsightedness of Ugyen Wangchuck that for the first time Bhutan was united under a central authority, which provided the country with stability and opportunity for development. In 1926 his son Jigme Wangchuck, who ruled until his death in 1952, succeeded Ugyen Wangchuck. The third Druk Gyalpo, Jigme Dorji Wangchuck began a campaign of modernization and expansion of Bhutan's government and society based on the accomplishments of his two predecessors in uniting the country under a strong central authority. Hence, the National Assembly consisting of representatives of the people, the Monastic order and civil administration was reestablished in 1953. The present Druk Gyalpo, His Majesty King Jigme Singye Wangchuck acceded to the throne in 1972. His Majesty the king is the head of state. The head of government is nominated from among the Cabinet Ministers. There has been steady decentralization of decision-making and institute building since His Majesty the King was enthroned. The most momentous change in the structure of the government came in 1998 after the devolution of the executive power by His

Majesty the King to the Council of Ministers. The change set off a process of adaptation in the relationship between the various branches of the government, as shown in **chart 1** it reflects the logical delineation in the separation of powers along with the establishment of elected Council of Ministers with full executive powers. It shows the apparatus of all the important aspects of the Bhutanese system of governance like the executive, legislative and judiciary going down from the central to the district levels.

Under the unity and farsighted leadership provided by His Majesty the King, the nation will be governed primarily through the Cabinet. The Cabinet Ministers are the heads of ministries, who will oversee that policies are formulated and programmes are carried out. The autonomous bodies have interactions primarily with the ministers, and this is denoted as such in the organogram.

The National Assembly: The Tshogdu (The National Assembly) consists of 150 members; 105 are the elected representatives of the people, 10 are from the Dratshang (Clergy) and 35 are nominated representatives of the Government. The National Assembly as the legislative body, is an independent institute, which elect Cabinet Ministers, approve annual budget and legislate acts governing the country, and discuss national issues. The people's representatives are directly elected by the people of their respective constituencies through secret ballot. The representatives of the clergy are elected by the Zhung Dratshang (Central Monastic Body) and the concerned Rabdeys (District Monastic Bodies). The representatives of the government are nominated by the King from among senior civil servants. All the members serve for a term of three years. The Speaker and the Deputy Speaker are elected by the National Assembly from among its members. The National Assembly meets twice a year. The assembly enacts legislation and advises the government on all matters of national importance. Decisions are passed by a simple majority. A secret ballot is taken on all matters of national importance. Any Bhutanese over 25 years of age can be a candidate for membership.

The Royal Advisory Council: The Lodey Tshogdey (The Royal Advisory Council) was formally established in 1965 to advise the King and government ministers and to supervise the implementation of programs and policies laid down by the National Assembly. The Royal Advisory Council will continue to be consultative and advisory body. The Royal Advisory Council, as stipulated in its chatrim, will ensure the observance of the decisions made during the National Assembly and the Cabinet meetings. Therefore, it will have links with both the Cabinet and the National Assembly. It consists of nine members. There are six

representatives of the public (Measer Thuepoens) who serve for a term of three years. They are elected by the National Assembly through secret ballot from among the representatives of the Dzongkhags. Each Dzongkhag (district) deputs one representative who is elected through secret ballot from among the public. Two members represent the Monastic Body, one each from the Central Monastic Body and the Rabdeys who serve a term of one year. The chairman (Zhung Kaloen) is nominated by the king.

The Monastic Body: The Monastic Body is comprised of the Central Monastic Body and the Rabdeys (District Monastic Bodies). The current strength of the Monastic Body is about 5,000 registered gelongs (monks) and is financed by an annual subsidy from the Royal Government. Punakha and Thimphu Dratshang having a strength of 1,600 constitutes the Central Monastic Body. The Monastic Body is the sole arbiter on religious matters. The Je Khempo who is chosen from among high-ranking gelongs is the head of the Body. He is assisted by four high ranking Lopens of the Central Monastic Body.

Local Government: Local administration has been strengthened to meet the requirement of decentralized administration and development. There are twenty dzongkhags or districts each under the charge of a dzongkhag administrator or dzongda responsible for civil administration and development activities. Each dzongda is assisted by a dzongrab who is responsible for planning and development and civil administration. The larger dzongkhags are sub divided into dungkhags headed by a dungpa. A Group of villages, from a gewog, the lowest administrative unit each gewog has a headman called the gup (in the north) or mandal (in the south). In each dzongkhag the dzongda is assisted in his development function by the Dzongkhag Yargye Tshogchung (District Development Committee) which consists of people's representatives and government officials.

The Judiciary: Bhutan's Legal Code is based on that laid down by Ngawang Namgyal, the first Shabdrung who arrived Bhutan in 1616. Traditional Buddhist precepts are significantly maintained in the legal processes. The High Court consists of eight judges. There is a court in each dzongkhag headed by a Thrimpoen and assisted by Ramjams but minor disputes are settled by village gups. As the final arbiter of law, the judiciary has been independent from other branches of the government since its inception.

GENERAL INFORMATION

EXPLANATION OF SYMBOLS USED IN THE YEARBOOK

n.a	stands for "not available"
..	stands for "not applicable"
-	stands for "nil or rounded to zero"
*	stands for "sampling error too high for accurate estimation or estimates less than one percent"
()	stands for negative numbers
CY	stands for calander year, period from January to December
FY	stands for fiscal year, period from April to March upto 1985/86 and from July to June since 1986/87 unless other wise specified.

EXPLANATORY NOTES

1. In some cases, minor discrepancies may occur between sums of component items and totals because of rounding.
2. Dzongkhags given in some tables differ from those given in Annex I. This is because of changes following the creation of new Dzongkhags.
3. Totals of items may not add up slightly due to rounding.

SOME UNITS OF MEASUREMENT

Numbering (UK)	
Hundred	= 10^2
Thousand	= 10^3
Million	= 10^6
Billion	= 10^{12}
Trillion	= 10^{18}

A. Length Measurement**1. Metric equivalents**

10 mm	= 1 cm
10 cm	= 1 dm
10 dm	= 1 m
10 m	= 1 dkm
10 dkm	= 1 hm
10 hm	= 1 km

Abbreviations

mm =	millimetre
cm =	centimetre
m =	metre
dm =	decimetre
hm =	hectometre

2. British units

12 inches	= 1 foot
3 feet	= 1 yard
5.5 yards	= 1 rod, pole
4 poles	= 1 chain
10 chains	= 1 furlong
8 furlongs	= 1 mile

3. Conversion from British to metric units (lengths)

1 inch	= 2.539998 cm
1 foot	= 0.3047997 m
1 yard	= 0.9143992 m
1 mile	= 1.609343 km
1 nautical mile	= 1.853182 km
1 m	= 39.370113 inches
1 m	= 3.280843 feet
1 m	= 1.093614 yard
1 km	= 0.6213717 miles

B. Area measurements**1. British units**

144 square inches	= 1 square foot
9 square feet	= 1 square yard
30 1/4 yards	= 1 square rod, pole
40 square rod	= 1 rood
4 roods	= 1 acre
640 acres	= 1 square miles

2. Metric units

100 square mm	= 1 square cm
100 square cm	= 1 square dm
100 square dm	= 1 square m
100 square m	= 1 are
100 square ares	= 1 hectare
100 hectares	= 1 square km

3. Conversion from British to Metric units (Area)

1 square yard	= 0.836 square m
1 square feet	= 0.093 square m
1 square inch	= 6.452 square cm
1 square m	= 1.196 square yard
1 square m	= 10.764
1 square cm	= 0.155 square inch
1 square mile	= 2.590 square km
1 square km	= 0.386 square mile

C. Weight measurements**1. British units**

16 dram	= 1 ounce
16 ounces	= 1 pound
28 pounds	= 1 cwt
20 cwt	= 1 ton
14 pounds	= 1 stone

2. Metric units

10 mg	= 1 cg
10 cg	= 1 dg
10 dg	= 1 g
10 g	= 1 dkg
10 dkg	= 1 hg
10 hg	= 1 kg
100 kg	= 1 quintal
200 mg	= 1 carat

3. Conversion from British to metric units

1 grain	= 0.0648 g
1 ounce	= 31.103 g
1 g	= 15.432 grains
1 pound	= 0.373 kg
1 tonne	= 1.016 metric tonne

D. Conversion of air temperatures

1. Degree celsius to degree Fahrenheit
 $(9 \times T_c) / 5 + 32$, where T_c is temperature in degree celsius
2. Fahrenheit to degree celsius
 $5 \times (T_f - 32) / 9$, where T_f is temperature in fahrenheit

CHAPTER 1: POPULATION

The main source of statistics on population is the population census. Population censuses are undertaken in most countries on a five or ten yearly basis aimed to provide a full count of the population according to a range of characteristics such as demography, health, education and other social aspects. Censuses are useful not only because they provide a range of current population data but also use as a benchmark for making population estimates in non census years and for population projections. The Population census were undertaken in Bhutan in 1969 and 1980. The population figures for those early years were large because of the large influx of migrants from neighboring countries, particularly labor migrants at the instance of construction coinciding with the large scale development work on infrastructure expansion. With the development emphasis changing to human resource development the large migrants moved out and in 1996 the total population was found to be around 600,000. The next round of Census is scheduled for 2005.

The second major element of population statistics relates to the demography characteristics of the population. The most common source of information on demography is the vital registration system (which usually covers the registration of births and deaths and sometimes marriages and divorces). In Bhutan, the vital registration system does not currently provide the full coverage of births and deaths and it has been necessary to undertake special sample surveys, (the first one in 1984, and second one in 1994 and 2000) to obtain the important demographic information. Statistics presented in this chapter includes estimates of current population together with data from 1984 on demographic survey and 1994 and 2000 National Health Surveys. These special surveys carried out at certain intervals provide the changes that are occurring in the population and its indicators. The population data presented in this chapter is an estimated population using the annual growth rates resulting from the National Health Surveys. The interpretations of demographic indicators are as follows:

Crude birth rate: Number of live births in a year per thousand population.

General fertility rate: Number of live births in a Year per thousand women in the childbearing age (15 to 44 or 49).

Total fertility rate: Average number of daughters born by women during their reproductive span of life.

Gross reproductive rate: Measures the extent to which a cohort of newly born girls will replace their mothers under pre-determined schedules of fertility and mortality.

Crude death rate: Number of deaths in a year per thousand population.

Infant mortality rate: Number of deaths during first year of life per thousand live births.

Maternal mortality ratio: The annual number of deaths of women from pregnancy-related causes per thousand live births.

Rate of natural Increase: the difference between the crude birth rate and the crude death rate.

Dependency ratio: Measures the number of dependents as a percentage of population aged 15 to 64. Child dependency refers to children aged 0 to 14 years, while old age dependency refers to persons aged 65 and over.

Index of aging: It is the number of persons aged 65 and over as a percentage of the number of persons aged 0 to 14.

TABLE 1.1: POPULATION ESTIMATES BY AGE AND SEX, 2002

Age group	Persons			Percent		
	Total	Male	Female	Total	Male	Female
0 - 4	110,690	55,468	55,222	15.5	7.7	7.7
5 - 9	103,767	51,525	52,242	14.5	7.2	7.3
10 - 14	86,804	43,962	42,843	12.1	6.1	6.0

CHAPTER 2: HEALTH

Efforts to establish modern medical facilities in Bhutan were begun in 1962. The Department of Health Services now has wide spread network of Health Facilities across the country, covering around 90% of the population. Institutional health facilities were earlier concentrated in the urban centers, but today the emphasis has shifted to the rural areas where the majority of the population live. Health Care is delivered in a totally integrated system through an organized structure placed at the National, Regional and District Hospitals serving as Referral Centres followed by the Basic Health Units (BHUs) at the Community Level. Basic health units (BHUs) serve remote areas staffed by well trained paramedical personnel are equipped to treat minor ailments and advise on preventive measures to avoid the spread of communicable diseases. Extended Health Centres (Outreach Clinics) and Mobile Health Units support these BHUs.

There are also a number of special health programs in Bhutan administered by the Department of Health. These cover Child Health and Immunization Program, Reproductive Health Program, Acute Respiratory Infection (ARI) Program, National Control of Diarrhoeal Disease Program (NCDDP), National STD/AIDS Control Program, Rural Water Supply & Sanitation Program (RWSS), Village Health Workers Program (VHW), National Leprosy Program, National Malaria Control Program (NMCP) and Mental Health Program. As of 2001, there were 29 hospitals, 168 BHUs and over 445 Outreach Clinics manned by over 2000 health personnel of different categories.

Besides the allopathic system, there exists a well established network of Indigenous Medical Facilities under the Institute of Traditional Medical Services that has basically three functions; medical services for out patients; collection and manufacturing of indigenous medicines; and research and training of the Physicians (Drungtsho) and Compounders (Menpas). As of 2001, there were 13 Dzongkhag Level Indigenous Medical Units attached to Dzongkhag Hospitals, each run by a Drungtsho or Menpa. There were 31 Physicians (Drungtsho) and 17 Menpas working in indigenous medical service units.

The main indicators of the health status of the population are morbidity and mortality. Morbidity refers to the type of illness people suffer from, while mortality relates to death rates and causes of death. The Health Department has been conducting the National Health Surveys every five years and this is the source for mortality statistics. Over all level of mortality have been estimated from the Demographic Sample Surveys, but causes of death data have not yet become available. Efforts are under way to improve the vital

registration system. Morbidity data are obtained from the patients' records in hospitals and Basic Health Units whose data are presented in the annual publication of Health Department the "Annual Health Bulletins". The available morbidity statistics are based on patients treated by hospitals, basic health units and dispensaries.

General health conditions in Bhutan are affected by low nutrition intake, poor sanitation, high prevalence of parasitic infections and contagious diseases. Acute Respiratory Infection continues to dominate entire morbidity situation. There is also a rising condition of the non-communicable diseases.

TABLE 2.1: SUMMARY OF HEALTH FACILITIES AND PERSONNEL, BHUTAN, 1996 TO 2001

Facilities	1996	1997	1998	1999	2000	2001

CHAPTER 3: EDUCATION

The development of a comprehensive education system in Bhutan was initiated in 1961. Prior to that time there were virtually no modern education facilities inside Bhutan, apart from the traditional education given in the monasteries. Today there is an extensive network of Schools and other educational institutions spread throughout the country. The present formal educational structure consists of one-year pre-primary (PP) six years primary, four years secondary (comprising of two years junior college and three years of degree programme).

Entry into the formal education system starts at the age of six when the children are admitted into preprimary classes. The medium of instruction in the schools is both Bhutan's National language 'Dzongkha' and English. School curricula also include training in traditional arts, crafts, and agriculture. Besides the modern education system, there is large number of traditional institutions offering education to children in monasteries, Drupdas and Shedras, for which data are not maintained by the Education Department. Non-formal education first began formally in 1992, although that existed in disorganized traditional forms earlier. The division of education maintains an extensive range of data on students, schools and teaching personnel and the summary data are presented in this chapter.

The gross Primary enrolment rate in 2000 was estimated at 72 %. There were 126500 students enrolled in 574 schools/institute and 146 Non-formal education centers. Of 574 schools and institute only 7 were privately run while the rest was government run. In 2001, there were 164 community schools catering to small and far flung communities. A community school is the basic level in primary school system, which caters to a specific community, a village or a cluster of defined villages. Number of Non Formal Education centers expanded from 6 in 1992 and 300 learners to 146 centers within 7,488 learners in 2001. The NFE centers provide only basic literacy courses of reading and writing.

The size of enrolment was highest in Thimphu Dzongkhag followed by Trashigang, Chukha, Samdrupjongkhar and Mongar. Many schools provide boarding facilities for students living in areas far from the nearest school. Children from communities who do not have their own schools enroll in the more distant school either as day scholar or as a boarder. This is made possible largely through the provision of meals through world Food Programme (WFP). At present, 8 community schools and 73 primary schools benefit from the WFP programme. A total of 12443 children study as boarders in 2001.

CHAPTER 4: HUMAN RESOURCES

The economy of Bhutan is characterized by the predominance of people engaged in self-employment, particularly those working on their own land. There is also a good deal of small cottage industry often undertaken in the home. The number of person working for wages is relatively small. Statistics on human resources are designed to measure the involvement of people in economic activities. Economic activities refer to the production of economic goods and services and include the people who are self-employed (e.g. farmers operating their own land) as well as persons who work for wages (i.e. employees). Broadly, a statistical system for human resources should cover topics such as size and characteristics of the labor force, employment, wage rate and conditions of work. Labor statistics usually presented in this chapter are from sample surveys and the national Labor Force Survey conducted annually since 1998. The Central Statistical Organization, Planning Commission conducted the two consecutive Labor Force Surveys in 1998 and 2000. The Department of Employment and Labour conducted the third round of Labor Force Survey in 2001 since its creation in 2000.

Although Share of primary sector in GDP is gradually decreasing, agriculture is still the predominant sector providing employment to around 75% of the labor force. Labor force is marred by high dependency ratio of around 70%. Younger age dependency ratio of 61.4%, besides having a momentary burden yet promises of an expanding work force for the future on the other hand. The old dependency ratio of 9% is an indication of growing number of old age people that'll have a bearing on the socio economic condition in the future. The private sector is emerging as the important sector generating employment opportunities for increasing labor market. Unemployment rate in 1999 was estimated to around 1.4 %. It was also observed that 68% of all the unemployed were those in ages between 15 and 29.
